How to Make Money From Home, Doing Online Marketing

...Building A Six Figure **Network Marketing** Business Leveraging On An **Online System** That Works, An **Unconventional Approach** Unknown To So Many People!

Compiled By

Joe Oguntola

Websites: www.superbhealthtips.com, www.nairaatwill.com

Introduction

The essence of this report is to quickly show you without wasting any time, a proven system that can earn you extra income and if you are really serious about it, can build you a lifetime monthly cash flow of passive income, starting now.

Let me ask you a question:

Do you think it is actually possible to sell to someone you never knew, have your product delivered to the customer, get paid into your Nigeria bank account, without leaving your room, or meeting your customer in person?

Most persons will answer “No, Impossible etc.” But in this report, and the ones to follow, we will show you exactly how to do this, and in the end, smile to the bank.

I can say that confidently because that is what I, as well as some few others are doing everyday.

Who Are We?

We are a team of Online Marketers. At the same time, we are professional network marketers.

Combining these 2 skills, we became the first of its kind in Nigeria to start marketing high volumes of physical products ONLY through the internet, without any physical contact with our customers.

And our chosen company is the Forever Living Company.
Hence, we are Forever Business Owners (FBOs)

However, we don't do network marketing the way most people in this country do it-running after friends and family members, struggling to sell products they have stockpiled.

If that is the only way to do network marketing, then I would fail, because I just do not like the idea of disturbing people.

However, our exceptional and unique approach to network marketing, especially the Forever Business plan, made marketing fun, easy and very interesting.

This is why we have decided to create a system of mentorship that will enable us teach and mentor just 100 ready and serious people in the direction of learning, doing, and achieving the kind of results we have already.

This report, and the ones to follow, will be practical and straight to the point. We are only revealing to you what we have been doing daily in the last several months with amazing results.

If you just stumbled on this report without going through the appropriate protocol, you can visit www.nairaatwill.com/free to register, so you can get more free training, support and proofs of our amazing results!

The whole essence of this report is to show you how to start immediately, counting on our mentorship and support.

**It doesn't matter what
your background is...**
ANYBODY
Can Do This!

THE SYSTEM

The opportunity I am about showing you leverages on sales.

To be rich, you must learn to sell something. It could be a product or service

(I know you are already contemplating tuning off...Just wait until I finish. It's not what you think!)

Most people detest selling. In fact, when they see that word "sell", what comes to their mind is the conventional, tedious way of hawking, disturbing people to buy, or opening a shop and displaying goods to sell, etc.

According to T. Harv Eker, (author of the book "Secrets of The

Millionaire Mind), he referred to selling as one of the world's highest-paid professions.

Well the truth here is that all of us have, at one time or the other sold ourselves in various ways. We have communicated our values, opinions and desires in various ways to other people using this same concept.

Thank God for technology. Selling is now very easy. You can be in your house and sell your product, service, or ideas to anyone anywhere across the globe.

Look at the following pictures. Do you agree with me that these billionaires are all selling a particular thing to the world and from there, make their money everyday?

Figure 1-Billionaires

From Top: Aliko Dangote, Mike Adenuga, Mrs Modupe Alakija

Below: Bill Gates, Donald Trump

If you are not sure what these billionaires are selling, just type their names into Google!

THE OPPORTUNITY

Rex Maughan (Founder, Forever Living Products)

Forever Living Product (FLP) is the company behind this great opportunity.

Irrespective of what you think you know about this company and their products, the fact remains that this is a system that works.

Forever Living Products is one of the best Network Marketing Companies around the world.

This company started in 1978. The company came to Nigeria over 15 years ago.

This company has systems in place and has developed over 200 products from Aloe Vera and Bee products.

Forever Living Products own over 80% of the world's Aloe Vera production. Aloe Vera has been around for a long, long time, widely called "Nature's Doctor."

Forever Living Products have survived the years because their products have universal appeal, promote health and beauty, and are of the highest quality and purity.

The company is vertically integrated – meaning that they are fully on top of the production of their products right from their farms.

Interestingly, all our products are fully certified by the relevant bodies.

OUR APPROACH AND SYSTEM

When we started this business in 2014, we decided that we won't do it the conventional way.

We wanted to use an approach that will encourage people to see this as what they can do. We decided to simplify the business in such a way that a new prospect will be encouraged to start off immediately.

Considering our vast experience in this industry and on the internet, especially when it comes to internet marketing and social media marketing, it became obvious to us that since the products of this company are so valuable, the best thing to do is to leverage on the power of the internet and social media to make it more visible.

This we did and it worked!

So, we have done this over and over again before empowering people on how to do this business same way that we did.

And now, we have even improved more on our strategies by automating most of the technical aspects of getting started.

What the rest of this report will be doing now is to show you how to get started, and what you need to do immediately you become a registered FBO.

HOW DO I START

To get started means you are ready to become an FBO.
Who is an FBO?

An FBO is a Forever Business Owner. It's all about business ownership, especially a form of business ownership that can lead to passive income generation.

Passive income generation is the ultimate ticket to financial freedom.

Forever Living business, or any form of network marketing business will never work once you don't have a marketing system, especially the kind of marketing system that we use where customers are the ones running after you, rather than you running after customers!

What we have done is to create a system that will allow you to start immediately with our own kind of marketing system already installed for

you. Just copy and paste!

One of the reasons the marketing system also work for us is that rather than sell just products, we sell SOLUTIONS.

Customers don't just buy products. They're only interested in buying products that will solve a definite problem for them.

And our top secret is that we don't give solution to just any problems, but problems with a lot of emotional attachment. More on this later.

So when you decide to start with us, you will be permitted to choose a desired package.

Each package comes with a definite market area that has been tested to work. It therefore means that when you activate your package, you can choose any of the market area that is of interest to you, and the marketing system for that market area will be released for you to start using immediately.

This we have done for you leveraging on some very profitable markets that have been tested and proven to work.

We will quickly take you through some of those market areas now and also show you the various website templates that have been designed for each of these markets.

These are the same templates we have used and taught some of our team members to use. Till today, they are still very profitable, and they will continue to be.

OUR MARKET AREAS

Below are our hot market areas:

1. Weight Management Market

This is a very huge and hot market. I never knew Nigerians are so conscious of their weight until I started doing this business.

The reason is because everyone is now beginning to understand the health hazards of being overweight (heart disease, high blood pressure, diabetes, high cholesterol and even sudden death).

Beyond the health complications associated with being overweight, the emotional attachment is huge.

I have seen women who were more or less begging to get our weight management product so that they can fit well into their birthday or wedding dresses or because they are afraid their man will go after another woman just because they are getting too big.

These and many more are the levels of emotional attachment associated with being overweight.

When you become fully registered with us, you will be trained to be able to set up your entire system in your chosen market(s) so that it will be so easy to reach out to so many prospective customers and hence give your business a leverage compared to someone who just joined the business and feels he/she can make things happen by walking around the street disturbing people.

2. Men's Sexual Health

This is another highly emotional niche/market area. The reason is mainly because most men will leave nothing undone to satisfy their sexual hunger.

So whenever something goes wrong with men's ability to play their God ordained role sexually, it becomes highly emotional and could affect their self-esteem in a way.

In view of this, most men may not care “how much it cost” to get that problem solved especially when the solution comes in a way that will not pose any danger to other body functions.

We have a range of products already combined to solve problems for men in this area.

Common problems like erectile dysfunction, premature ejaculation, lack of libido, low sperm count, have been completely managed with our product combination in this market area.

We also have already designed and tested online selling system for this market area and if you decide to pick this niche with your package, you will be trained to set up your marketing system or if you want, pay someone to do that for you within 48 hours.

3. Female Fertility Booster

This is another very hot niche, with several proven results.

Infertility is highly emotional for a woman. Every woman takes pride in becoming a mother. So when it's not happening or it is delayed, it

becomes a very big burden for the woman, who is mostly seen by her relative, in-laws, and society as the culprit!

Our fertility boosting products have been professionally selected and combined to assist, support and aid conception.

We also have already designed and tested online selling system for this market.

4. Fibroid Solution Market Area

Fibroid is a condition that is prevalent in 50-80% of women within childbearing age. At times, it occurs with pregnancy.

Fibroid may not necessarily affect a woman's ability to conceive, but it may increase the risk of miscarriage, preterm birth, or breech birth.

Because of the close link between Uterine Fibroid and child birth, it becomes very emotional.

Our range of fibroid removal products have been professionally selected and combined to assist, support and stop the growth of the body. Positive testimonies are everywhere.

We also have already designed and tested online selling system for this market area.

5. Diabetes/Blood Pressure/Wellness Market Area

Diabetes is a very popular disease. As a matter of fact, about 3.7million cases of diabetes have been diagnosed so far in Nigeria alone (with so many yet undiagnosed!) There are over 322 million cases globally.

The challenge here is not just the diabetes. The major thing is the emotional imbalance it poses to sufferers who have been placed on several restrictions by their nutritionists and physicians in terms of what they can eat.

Also, there are various complications of diabetes with several emotional effects like eventual reduction in sexual ability most especially for men.

If not properly managed, it could affect vision, the kidney, and vital body functions as well.

One beautiful thing about this niche is that you have several sufferers who have money to spend here. They mostly don't care how much it cost as long as it's going to work.

However, this is a niche where knowledge is essential. You must understand very well what you are selling here or else your clients will throw you off balance with their questions.

Nevertheless, it should be noted here that everything needed to succeed in this market area in terms of knowledge will also be

made available in the course of the mentorship program.

Our range of diabetes management and wellness products have been professionally selected and combined to assist, support and reverse diabetes, and without any side effect.

We also have already designed and tested online selling system for this market.

6. Skin Care (With Special Focus on Stretch Marks)

Stretch mark is highly emotional and it's common in several women.

Due to this condition, many women have stopped wearing some of their beautiful "armless dresses" because they don't want people to see their stretch marks.

Many have placed themselves on several other restrictions.

A young lady with spots on the leg might not find it so convenient to wear short skirts. Those with facial spots don't like it too.

Females especially take very special care of their skin for obvious reasons.

Beauty has been part of humanity from time immemorial. In the course of maintaining our beauty, some people have gotten themselves into trouble by using skin care products that eventually subjected them to skin cancer because of the toxic ingredients they are made from.

In view of the huge market available, and the fact that our company has several effective skin care products, feel free to build a business around this market area, because we already got you covered.

7. Vision Care (Eye Care)

What could be more terrible than having a pair of eyes and not

seeing well?

Several people, old and young usually have eye challenges nowadays due to several known and unknown reasons.

Irrespective of the kind of eye defects you may have, two of our products have been doing this “magic” for a while now.

They are specifically manufactured and designed to manage ocular (eye) problems.

And we also have a ready-made marketing for this hot niche

All these market areas have been specially selected because of two things;

- a. The population of people with these needs
- b. The emotional attachment involved

The beauty of our system is that everything has been designed, the right products combined, and they have been tested.

Also it should be noted that our research team of specialists keeps coming up with different market areas on a monthly basis.

As a matter of fact, there are others not listed here because they are undergoing testing. They will be added for your use as soon as the research team gets through.

Having Seen The Several Market Areas Available to You On The Forever Business Opportunity, What You Need Now Is The Right Approach To Properly Starting The Business.

With our tested and proven approach, you will be able to do the following:

1. You will be able to market your products to anyone anywhere in the world
2. You will be appropriately mentored to know what to do anytime
3. You will be taught how to create your marketing websites to promote any of these market areas.
4. You will be taught how to do targeted adverts on platforms like Facebook, Online newspapers, blogs like Linda Ikeji's blog and so on.
5. If you are a busy professional, you can combine this business with your job and still do well.
6. You will also be linked to an online support system where you can learn more about this business without leaving your house.

This and many more will be revealed in the SECOND PART of this report!

The second part will contain PDF reports like this, video training, and online resources.

Our live training program will also be disclosed there.

Don't be surprised that this report has PART 2. It's my way of actually getting the VERY READY 100 to empower in this business.

Network marketing needs a lot of support and leadership. The reality is that I can't work with everyone.

I need those who are genuinely serious.

As mentioned before, you will never be charged a dime here. We will ensure that.

How then do we ascertain your readiness and seriousness?

You have some requirements to meet.

REQUIREMENTS

You must be ready to raise cash for:

1. Buying products in your chosen market(s) worth at least 1 Case Credit (or cc.)

Case credit is our unit or value assigned to each product. More on this later.

2 units start-up products is deemed preferable because it qualifies you to start earning commissions on your team's activities same month.

1 unit worth products costs N65,500 for now. Can go up or down depending on the prevalent exchange rate

This is your main requirement to get the second part.

2. Your website registration and online advert. These are necessary to help push out the products to your customers in a week or less. This is Guaranteed!

MY ASSURANCE

If you follow the training to be provided, you will start seeing instantaneous result.

You will not need to wait for days before customers will be running down your phone battery with calls to buy products.

So if you are genuinely ready, you need to meet the above requirements and the SECOND & CONCLUDING PART of this report will be sent to you FREE OF CHARGE.

Besides, you will be able to join our live, practical training if you are in Benin or Lagos.

If you are outside these locations, you will be able to join our webinars and have access to all our training videos, free of charge.

Once ready, feel free to contact me for any assistance and I will be there.

Thank you for taking out time to read through this report. But reading means nothing without application. So, take time to think about this information to better your life and those of your loved ones.

To your success,

Joe Oguntola
